

Ecommerce Sales Dashboard Dashboard

Indian E Commerce Sales Dashboard (Power BI) – Project Description

This **Power BI dashboard** analyses sales performance of an Indian supermarket using interactive visualisations and key business metrics. It provides insights into **total sales, profit, orders, product categories, customer segments, payment methods, and regional performance** across different states and cities in India. The dashboard enables stakeholders to identify sales trends, top-performing products, and profitable regions, helping them make data-driven decisions to improve business performance and customer satisfaction.
